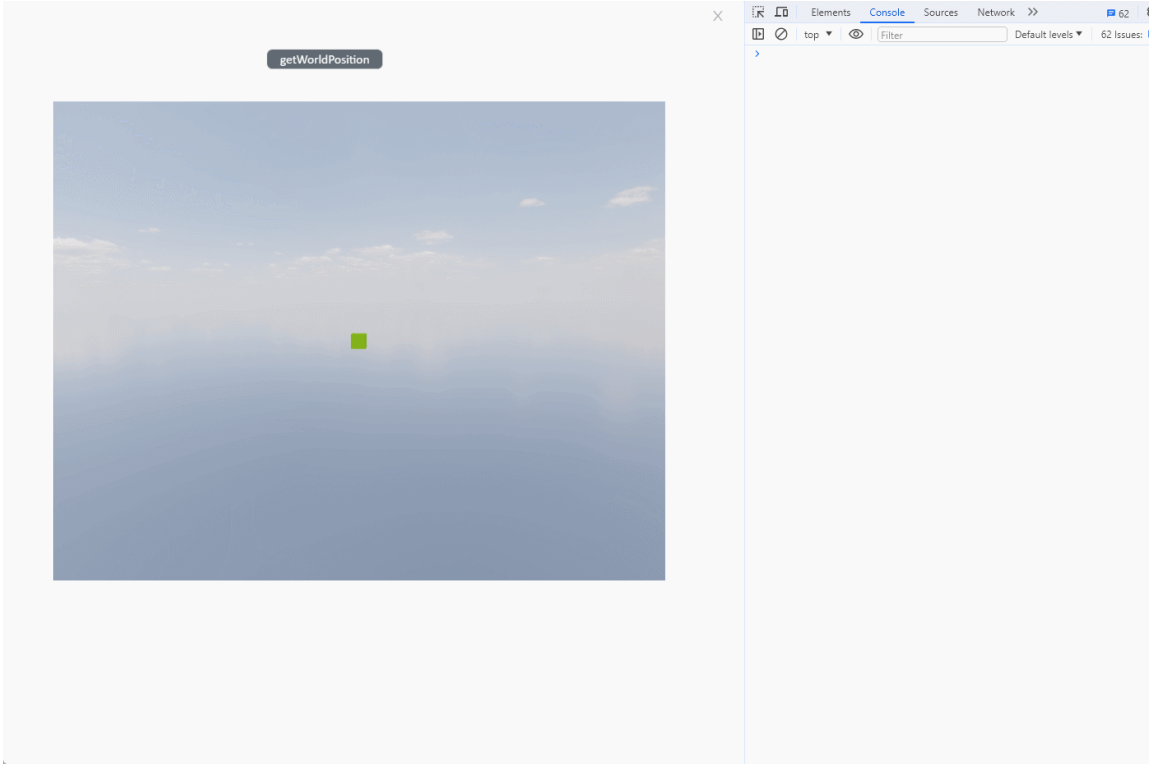
getWorldPosition

Description: Obtain the world coordinates of the model

```
const view = await System.UI.findControl('3DViewer1')// Obtain a 3D viewer
control named "3DViewer1" in the page
const scene = await view.getScene()// Get the scene in the 3D viewer control
const box = scene.createBasicMesh ({
  type: 'Box',//The address of the model in the model library
  name: 'Box2',//The name after creation
  color: '#6ec800',//The color created
  position: {x: 0, y: 0, z: 0},//The created position
  rotation: {x: 0, y: 0, z: 0},//Rotation angle during creation
  size: [30, 30, 30]
});
console.log(box.getWorldPosition())// Console output model world coordinates
```

Example:


Write the above code on the button, click the button to obtain the world coordinates of the model.
