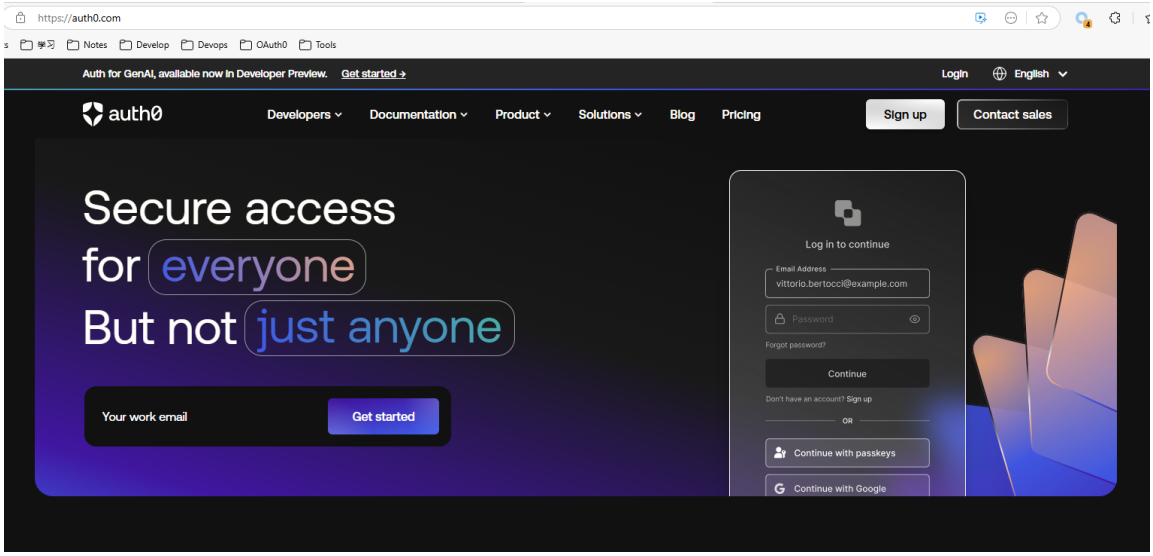
Integrates with OAuth0

Auth0 is a flexible, drop-in solution to add authentication and authorization services to web applications and mobile applications. It provides a secure and scalable identity platform that supports a wide range of identity providers, such as username/password, social logins (Google, Facebook, etc.), enterprise logins (Active Directory, SAML), and passwordless options.

VC Hub is compatible with OpenID Connect (OIDC) and can seamlessly integrate with Auth0.

1. Navigate to the OAuth offical page(https://auth0.com/), the clcik the "Sign up" button



1. Signup with email address or social account such as Microsoft, Google and Github
